

## Novavax Investor Relations

GAITHERSBURG, Md., July 20, 2020 (GLOBE NEWSWIRE) -- Novavax, Inc. (NASDAQ: NVAX), a late-stage biotechnology company developing next-generation vaccines for serious infectious diseases, today announced that Gregory M. Glenn, M.D., President of Research and Development, will present progress of NVX-CoV2373, Novavax' COVID-19 vaccine candidate, at the 2nd International Society for Vaccines Virtual Congress.

Dr. Glenn's presentation will be followed by a Q&A discussion. Webinar details are as follows:

Topic: Progress with the Full Length Recombinant Spike Protein  
Nanoparticle Vaccine

Date and Time: Tuesday, July 21, 9:55 a.m. ET

The webinar is free to attend. To register, please click [here](#).

### About NVX-CoV2373

NVX-CoV2373 is a vaccine candidate engineered from the genetic sequence of SARS-CoV-2, the virus that causes COVID-19 disease. NVX-CoV2373 was created using Novavax' recombinant nanoparticle technology to generate antigen derived from the coronavirus spike (S) protein and contains Novavax' patented saponin-based Matrix-M™ adjuvant to enhance the immune response and stimulate high levels of neutralizing antibodies. In preclinical trials, NVX-CoV2373 demonstrated indication of antibodies that block binding of spike protein to receptors targeted by the virus, a critical aspect for effective vaccine protection. A Phase 1 clinical trial of NVX-CoV2373 initiated in May 2020, with preliminary immunogenicity and safety results expected in July 2020. NVX-CoV2373 is being funded by the U.S. Government, through Operation Warp Speed up to \$1.6 billion, and the U.S. Department of Defense up to \$70 million, as well as by the Coalition for Epidemic Preparedness Innovations (CEPI) up to \$388 million.

### About Novavax

Novavax, Inc. (Nasdaq:NVAX) is a late-stage biotechnology company that promotes improved health globally through the discovery, development, and commercialization of innovative vaccines to prevent serious infectious diseases. Novavax recently initiated development of NVX-CoV2373, its vaccine candidate against SARS-CoV-2, the virus that causes COVID-19, with Phase 1 clinical trial results expected in July of 2020. NanoFlu™, its quadrivalent influenza nanoparticle vaccine, met all primary objectives in its pivotal Phase 3 clinical trial in older adults. Both vaccine candidates incorporate Novavax' proprietary saponin-based Matrix-M™ adjuvant in order to enhance the immune response and stimulate high levels of neutralizing antibodies. Novavax is a leading innovator of recombinant vaccines; its proprietary recombinant technology platform combines the power and speed of genetic engineering to efficiently produce highly immunogenic nanoparticles in order to address urgent global health needs.
