

Novavax's Updated COVID-19 Vaccine Now Available in France

December 19, 2023

FOR MEDICAL AUDIENCES ONLY

Novavax's updated protein-based non-mRNA COVID-19 vaccine is now available for use in France for the prevention of COVID-19 in individuals aged 12 and older. The vaccine is intended for adults and adolescents aged 12 and over, regardless of their vaccination history, but is not recommended for pregnant women pending further data, according to the National recommendation of the General Directorate of Health.

Our updated protein-based vaccine is now available for pharmacists and other healthcare providers to start vaccinating communities across France. As outlined in French vaccination recommendations, a diverse vaccine portfolio with both mRNA and non-mRNA options is critical to helping to protect communities across France against COVID-19 this vaccination season and in future.

The vaccine is being provided by the Ministry of Health and is available primarily in retail pharmacies beginning December 14, 2023, and in hospitals since December 7, 2023.

Forward-Looking Statements

Statements herein relating to the future of Novavax, its operating plans and prospects, including the availability of its updated XBB version of its Novavax COVID-19 Vaccine, Adjuvanted (2023-2024 Formula) (NVX-CoV2601) and the timing of delivery and distribution of its vaccine in France are forward-looking statements. Novavax cautions that these forward-looking statements are subject to numerous risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. These risks and uncertainties include, without limitation, challenges satisfying, alone or together with partners, various safety, efficacy, and product characterization requirements, including those related to process qualification and assay validation, necessary to satisfy applicable regulatory authorities; difficulty obtaining scarce raw materials and supplies; resource constraints, including human capital and manufacturing capacity, on the ability of Novavax to pursue planned regulatory pathways; challenges or delays in obtaining regulatory authorization for its product candidates, including its updated XBB version of its COVID-19 vaccine in time for the fall 2023 vaccination season or for future COVID-19 variant strain changes; challenges or delays in clinical trials; manufacturing, distribution or export delays or challenges; Novavax's exclusive dependence on Serum Institute of India Pvt. Ltd. for co-formulation and filling and the impact of any delays or disruptions in their operations on the delivery of customer orders; challenges meeting contractual requirements under agreements with multiple commercial, governmental, and other entities; and those other risk factors identified in the "Risk Factors" and "Management's Discussion and Analysis of Financial Condition and Results of Operations" sections of Novavax's Annual Report on Form 10-K for the year ended December 31, 2022 and subsequent Quarterly Reports on Form 10-Q, as filed with the Securities and Exchange Commission (SEC). We caution investors not to place considerable reliance on forward-looking statements contained in this press release. You are encouraged to read our filings with the SEC, available at www.sec.gov and www.novavax.com, for a discussion of these and other risks and uncertainties. The forward-looking statements in this press release speak only as of the date of this document, and we undertake no obligation to update or revise any of the statements. Our business is subject to substantial risks and uncertainties, including those referenced above. Investors, potential investors, and others should give careful consideration to these risks and uncertainties.
